

# Management Consulting

The business vision drives the strategy and tactics that lead to execution. AGSI's Management Consulting services operationalize the business vision, leading to a successful execution of the organization's objectives.

AGSI has worked with clients for more than 25 years to build strategic, mutually beneficial peer-level relationships. We do this by gaining a deeper understanding of the client's business and their goals.

**We recognize that the most important voice at the table is yours.**

Our clients know their business best. AGSI's consultants listen to our clients and leverage our management and consulting expertise to deliver value at all levels of the **AGSI Business Pyramid** across a variety of industries.

## The AGSI Business Pyramid

AGSI measures the success of our engagements by the value we bring to an organization and its bottom line. The result is a clear and on-target execution

strategy against the business vision and the organization's goals.

## Experience Counts

In addition to our Management Consulting capabilities, AGSI offers a full range of technology consulting services including Application Development and Support, Systems Integration and Project Management. Our Technology Consulting team works with our clients to make their business vision actionable.

## Our Management Consulting services include:

### **Business Process Improvement:**

Evaluation and improvement of current processes and deployment of new processes that are sustainable and measurable.

### **Organizational Change Management:**

Ensure that areas of the organization are aligned with, and optimized for, changes within the business model.

### **Enterprise Program Management:**

Improve the management of application portfolios, conduct complex project planning and scheduling and implement performance metrics.
